

WATER COMPLIANCE SERVICES

EnviroDocs™

JB&B's EnviroDocs™ is a streamlined, secure cloud platform, designed by experienced industry professionals, that allows building owners, managers, site engineers and compliance officers to manage compliance documents and Legionella-related activities, thereby saving time and money, improving document control, enabling top-level organization, and maintaining compliance to minimize potential violations.

This easy-to-use, intuitive document portal can help you quickly locate documents to respond to regulatory inquiries and meet documentation requirements, such as NYC Department of Health or New York State Legionella-related regulations and associated document inquiries during inspections.

SERVICE FEATURES

- **Security:** Documents are stored on our secure cloud platform, which is accessible to account owners using two-step user authentication protocols and data encryption.
- **Convenience:** Both desktop and mobile app versions are available. EnviroDocs™ gives you the ability to seamlessly upload and download files from the platform or by using our email-to-folder feature.
- **Task Management:** Our workflow feature allows the assignment of compliance tasks to team members and automatically sends out email reminders with due dates. Notifications are sent when tasks are past due.
- **Unlimited Storage:** The platform provides storage for project-relevant documents and information in one place, enabling easy access for compliance audits.
- **Site-Specific QR Codes:** Use of the codes allow users to land on pages and folders to access and submit reports, pictures and other compliance and related information.
- **Training and Support:** These services are integrated within the platform.
- **Access Control:** Users have the ability to control access within the organization by assigning individual usernames and defining levels of access.
- **Proactive Notification:** Responsible persons are notified when compliance-related reports or logs are filed or when documents have not been filed within a defined time frame.
